How do we sort out Waste at school?

What we do with

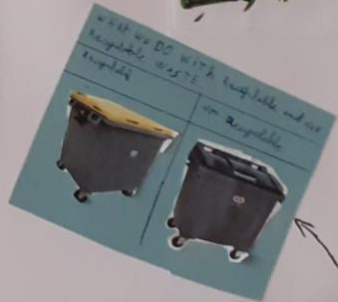

recycling is collected and given to the recycling bank.

glass

What happens
with glass? It is collected and given to the recycling bank. It is then melted and made into new glass bottles and jars.

What we do with food waste
In the canteen all the food goes to the bins except the orange peels and leftover meals.

Recycling Bank

WHAT WE CAN DO WITH GLASS

This waste can be recycled: glass and paper

↓ NAOHS 11

What we can do with recycled waste

What you could do is:

- you can put your used recycled bottles and tins in a bin to make bottles
- you can use your recycled paper to make paper

What water can be used for

For the garden

WATER

to wash the car

WHAT WE CAN DO WITH PAPER

HOW CAN WE SORT WASTE AT HOME

Finley

Verona Camille

What can we do with food waste?

this sort of food waste can be used to

Feed The Pigs

Compost For The Garden

Feed The Chickens

What we can do with the recycle waste

The non-recyclable

Pollution, whose fault ?

Cigarette Butts

A lot of people throw cigarette butts around

NO GOOD

GOOD

We should ALL do this

!!!NOBODY CARES!!!

-Léonie and Sarah

Thank light bulbs

No good

Good

PAPER

BUT LABELS ON THE BOTTOM TO LIST THE PAPER WASTE

good

no good

FROM THE PAPER WE RECYCLE

Sea Pollution

Boats must not throw waste into the sea

Very Good

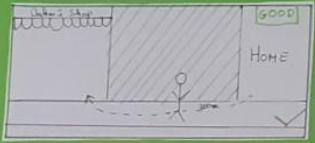

Car Pollution

NO GOOD

HOME

Do not drive a car to get bread but let's go on foot or by bike

GOOD

HOME

GOOD

animal death

NO GOOD

GOOD

THE RECYCLE OF GLASS

Vehicle Pollution

Consider alternative means of transport.

What will happen if we do nothing?

Disappearance of non-recyclable raw material like the petroleum, the coal

Our standard of living will therefore drop considerably.

The melting of glaciers will make the waters rise.

Rising temperatures leading to forest fire and drought

By this point, the Bommans will probably be gone. which will cause factories to explode due to lack of maintenance.

If we continue like this around 2050 the humanity will disappear!
